

**WATER TAP-IN INFORMATION
FOR
THE JACKSON-MILTON WATER DISTRICT**

◇ **Basic information;** The home owner is responsible for running the water line to the edge of the property. In most cases **a Curb Stop has been provided** and should be clearly marked. This is where the connection will be made by us. We will provide you with the meter (5/8" x 3/4") when **we make the tap**. You may call us for connection details @ 330-793-5514 ext 427. If the water line is **over two hundred feet** long from your home there may be other steps needed to connect. Should this be the case, you will be instructed on any special requirements.

◇ The cost is based on the size of the water line connection. The larger the tap the higher the cost. Backflow prevention is required for all commercial applications.

The base permit fee for a typical 1" tap- Single Family Dwelling- is \$1,500.

The fee must be paid in full at time of application. The permit fee may not be placed on the Real Estate Property tax listing. Information is available for individuals needing financial assistance with connection costs.

◇ For all new water permits proof of a **sanitary sewer connection is required first**. In the event the building has a Septic System, a Board of Health inspection will be required. The inspection cost is nominal and paid by the homeowner. If the septic system fails no water permit may be issued until such time that it passes inspection.

◇ ***This office recommends*** you hire only certified and insured plumbers to work on the water connection. To insure you receive a reasonable price for the work, the department recommends you contact more than one plumber/contractor for a price. A list is available through the BOARD OF HEALTH or our web site. [Mahoning County Board Of Health Plumbers list](#)

◇ Following these steps will insure a prompt issuance of your water connection permit.

Mahoning County Sanitary Engineering Department 761 Industrial Rd. Youngstown, Ohio 44509
